PROFILE

Computer Science student at the University of Vienna, currently in my 6th semester, with hands-on experience building full applications across backend, data and security. In my own projects I develop Python APIs with React frontends, analyse and model large datasets, build security tooling and deploy services myself. I gained first work experience during an IT internship at a large pharmaceutical company. I learn new technologies quickly and communicate comfortably in English and German.

KEY SKILLS

Programming	Python, Java, C++, JavaScript, TypeScript, SQL
Backend	FastAPI, Django, Django REST Framework, REST APIs, Pydantic
Security	Application Security, SAST, Bandit, OWASP, CWE, Secret Detection, Rate Limiting
Data & Analytics	SQL, Power BI, Excel, Pandas, NumPy, Jupyter Notebook, CatBoost, scikit-learn
Frontend	React, Vite, Monaco Editor, React Flow
Tools & Infrastructure	Docker, Docker Compose, Linux, Azure, Git, GitHub
Databases	PostgreSQL, SQLite
Languages	English (C1), German (C1), Ukrainian (Native), Russian (C1)

WORK EXPERIENCE

IT Infrastructure Intern — Boehringer Ingelheim, Vienna

July 2026 – August 2026

- Worked with structured internal company data in ServiceNow, including reviewing and cross-checking entries.
- First exposure to Power BI and Excel: used internal reports and evaluations on IT assets.
- Supported IT onboarding processes and day-to-day operations.

Customer Service — Do & Co, Vienna

2023 (Full-time)

- Handled customer requests professionally and efficiently in a fast-paced environment.
- Developed strong communication, teamwork and reliability skills.

SELECTED PROJECTS (GITHUB.COM/OLEGICKS)

- **GitHub Project Analyst** — Python/FastAPI backend and React frontend that analyse GitHub repositories in 11 languages, visualise dependencies as an interactive graph and generate LLM-written architecture insights.
- **AI AppSec Code Reviewer** — security pipeline combining static analysis (Bandit) with an LLM reviewer; findings classified by CWE/OWASP, secrets redacted before LLM calls, API rate limiting.
- **Car Price Predictor** — cleaned 762,000+ real used-car listings, trained a CatBoost model (R-squared = 0.90) and served it via a REST API and React frontend.
- **CloudOps Dashboard** — dashboard monitoring a containerised application on an Azure VM, with health checks and automatic container recovery.

EDUCATION

Bachelor's Degree in Computer Science — University of Vienna

March 2024 – Expected 2027 (currently 6th semester)

- Broad technical foundation in programming, software architecture and information systems.

Python / Django Track — Mate Academy

- Intensive backend training: hands-on projects in Python and building REST APIs, plus fundamentals in HTML, CSS and JavaScript for full-stack web development.
